

MARINE GRADE DECKING

www.lumberock.com

YOUR PERFECT WATERFRONT SOLUTION

Lumberock® Marine Grade Decking is the ideal choice for waterfront decking and your dock needs. It's completely waterproof, resistant to stains, fading and is impervious to water. Lumberock is the ideal solution for salt and freshwater environments and can even be fully submerged.

With Lumberock, you can enjoy the perfect balance of aesthetics and durability for your waterfront spaces.

FULLY SUBMERSIBLE

Lumberock's Marine Grade Decking is waterproof and can be submerged in water indefinitely, making it the ideal decking material for your waterfront lifestyle.

YOUR OUTDOOR OASIS

Lumberock will not warp, crack, rot, or splinter, guaranteeing you peace of mind and a life time of enjoyment.

INSPIRED COLORS

Lumberock Marine Grade Decking is offered in 12 colors, sure to compliment any design style. Have another color in mind? Custom colors are available.

TECHNICAL INNOVATION

We use our innovative technology to combine high density polyethylene plastic with mineral-fill, creating a solid, virtually indestructible material that can withstand the harshest marine environments without compromising the integrity of the boards. Lumberock is a solid, non-porous material that is 100% waterproof.
